Instructions

^ COLLAPSE ^

1. Visit w3schools and go to the Java Tutorial section: <https://my-learning.w3schools.com/tutorial/java>
2. Complete the following readings
 1. Strings Lessons 5.1 - 5.4
 2. Methods Lessons 10.1-10.5
 3. Classes Lessons 11.1 - 11.6, 11.15, 11.21
 4. File Handling Lessons 12.1 - 12.4

Guide:

1. Make sure you're in the main branch locally and ``git pull origin main`` any pending changes
2. Make a new branch per the recommended branch name below (`git checkout -b ...`)
3. Fill in the items in the worksheet below (save as often as necessary)
4. Once finished, export the worksheet
5. Add the output file to any location of your choice in your repository folder (i.e., a Module2 folder)
6. Check that git sees it via ``git status``
7. If everything is good, continue to submit
 1. Track the file(s) via ``git add``
 2. Commit the changes via ``git commit`` (don't forget the commit message)
 3. Push the changes to GitHub via ``git push`` (don't forget to refer to the proper branch)
 4. Create a pull request from the homework related branch to main (i.e., main <- "homework branch")
 5. Open and complete the merge of the pull request (it should turn purple)
 6. Locally checkout main and pull the latest changes (to prepare for future work)
8. Take the same output file and upload it to Canvas
 1. *This step is new since GitHub renders the PDF as an image the links aren't clickable so this method works better
 2. *Remember, the github process of these files are encouragement for your tracking of your progress

Response:

Mostly everything in the readings I have heard at least once and went over briefly atleast, nothing was unheard of to me. Although I have heard it all doesnt mean it didnt help me. The readings about file handling was good for me to read and learn and practice as i dont have that much knowledge on that, but the part with the java math was more of a refresher for me to make sure i remember everything. all in all it was good refreshers and good supplemental content to help my java skills.
