Instructions

^ COLLAPSE ^

- 1.
- 2.

Visit w3schools and go to the Java Tutorial section: <https://my-learning.w3schools.com/tutorial/java>

Complete the following readings

Classes Lessons 11.7 - 11.14, 11.16 - 11.20, 11.22 - 11.26

Java Quiz (on the tutorial page)

Guide:

1. Make sure you're in the main branch locally and `git pull origin main` any pending changes
2. Make a new branch per the recommended branch name below (`git checkout -b ...`)
3. Fill in the items in the worksheet below (save as often as necessary)
4. Once finished, export the worksheet
5. Add the output file to any location of your choice in your repository folder (i.e., a Module2 folder)
6. Check that git sees it via `git status`
7. If everything is good, continue to submit
8. Track the file(s) via `git add`
9. Commit the changes via `git commit` (don't forget the commit message)
10. Push the changes to GitHub via `git push` (don't forget to refer to the proper branch)
11. Create a pull request from the homework related branch to main (i.e., main <- "homework branch")
12. Open and complete the merge of the pull request (it should turn purple)
13. Locally checkout main and pull the latest changes (to prepare for future work)
14. Take the same output file and upload it to Canvas
15. *This step is new since GitHub renders the PDF as an image the links aren't clickable so this method works better
16. *Remember, the github process of these files are encouragement for your tracking of your progress

Response:

Alot of this stuff was a refresher for me. They werent completely unheard of but it was a good way to remember how everything works and to sharpen my skills as well. Almost everything looked and sounded familiar at the least and most stuff I have already had experience with from other courses. The regex section was something that was a bit

new for me and I got to learn more about that. Another section I would say was the ArrayList, wasnt so much new but much needed refresher.
