Response:

As I go over this Java stuff again, I'm happy to see that it all makes sense without much trouble. Even though Java isn't my best subject, going over these things again is helping me understand better. I feel like having the readings as a required homework weekly with the topic of the homework we do is good for me cause it helps me brush up on some topics that I might not be strong in and it also helps me refresh my memory for things I may have forgotten
